

Date	What are your questions or concerns about Septic Tanks (OWTS & LAMP) in Sunol?	Inform Sunol Issue	Email address provided
06/08/18	Non information , drag out issue to wear down public. Difficult working with rep . As per many people that have had to put in new system. Other counties inn state have went other directions. Donner lake area and many more . People trying to make a name for themselves at the expense of Sunol and polimeris canyon . Cleanest creek in Northern California , and we still are having to spend so much	V1N4	
06/07/18	Need an update on where things stand	V1N4	
06/04/18	If a community system is studied as an option for Sunol will it be a metered system that will be paid for based on the amount of use by individual hookups?	V1N4	
06/04/18	Is there a document that shows the new and what has been deleted in the new documents provided for the State? Where can this be found?	V1N4	
06/04/18	There is a study being done by Alameda County, Zone 7, and the City of Pleasanton regarding septic problems in the Happy Valley area adjacent to Sunol. Why is this being done? What data was the basis of the study? How much has been spent on the study and how much by Alameda County?Is there currently a ban on any additional septic systems or major work on septic systems in that area? When will this study be completed?	V1N4	
06/04/18	What are the assumptions that are being used to base the feasibility study on ? How much volume is assumed? How is this determined? What are the basic funding alternatives? What is the voter percentage required to establish a service area?	V1N4	
06/04/18	What are the current State or county requirements for composting toilets?	V1N4	

06/04/18	What are the most significant changes in the documents prepared for the State?	V1N4	
06/04/18	What is the process for requesting that a septic system be placed on another property adjacent to the property being served? Does the County have to approve this? What are the legal implications of such an arrangement? If such an arrangement is approved how can it be changed?	V1N4	
06/04/18	What kind of work can be done on a septic system that needs repairs, without County involvement? When is a permit required? What kind of inspections are required?	V1N4	
06/04/18	What needs to be done in terms of inspecting a septic system at the time of sale of a property?	V1N4	
06/04/18	What percentage of current septic capacity could be diverted to a full standard grey water system? What are current state requirements for a grey water system?	V1N4	
06/04/18	Why was the feasibility study initiated for Sunol? Is this being done for the next canyon over, which is Palomares, and very similar to Sunol? What is being done there or has been done there?	V1N4	
05/23/18	none at this time	V1N4	
05/22/18	Will all Sunolians have to pay multiple thousands of dollars?	V1N4	YES
05/21/18	Personally, I want to do the correct thing. If state and county mandates need to be enforced, then I will go along with such a program. Any requirement should be vetted by the majority and such a ruling should be enforced.	V1N4	
05/21/18	How will this impact each house hold? How will this impact resale? And will the surcomventing of the septic systems create stress on the forest that is already stressed after so many droughts?	V1N4	

05/20/18	Concern that decisions will be made by a select few if we have to attend all the meetings, which discourages participation by the fact that so little is learned at any one meeting. Tends to make people drop out from boredom, which is probably the intent. Great concern that this expensive project is a fix without a problem. For people with septic tanks that work well, the onus of having to dig a hole (which for our tank, takes quite a lot of effort) every two years to open for inspection, seems unreasonable for septuagenarians on a low, fixed income. And our septic tank is very near our front door, so the scar, which will never have time to heal, will always be an eyesore. Modern septic tanks are supposed to work well, and it seems like the first step should be to require old wooden ones to be replaced if it is determined that they are causing a problem. But since the park allows grazing in the park at the end of Kilkare Rd., then could it be that contamination of the creek might stem from that? Has our creek even been tested yet?	V1N4	
05/20/18	I have concerns that the community leach field is not the best solution.	V1N4	
05/20/18	where are we now in regard to existing systems	V1N4	
05/20/18	I don't want to be forced to replace my adequate, modern drainfield	V1N4	YES
05/20/18	I would be interested in having a summary of progress, what is going on, what is coming , etc.. I feel pretty "in the dark" about most of this topic.	V1N4	
05/20/18	Is there an update?	V1N4	
05/20/18	None	V1N4	
05/20/18	None.	V1N4	
05/19/18	What, if any, plans are there for a "city sewer"?	V1N4	YES
05/16/18	this is not an issue for me personally, but I am concerned w/ this problem for Sunolians who have are confronted w/ the county regulations	V1N3	

05/11/18	If our tank and leach field is about 250 ft away from the creek should we have concerns	V1N3	YES
05/10/18	let the buyer beware!	V1N3	
05/10/18	why is this an issue? where's the problem? we don't need more outside (county) interference	V1N3	
05/03/18	I would support a community septic system... As for existing systems, if they FAIL, replace them... if they adequately perform their function, let them stand.	V1N3	
05/03/18	I am concerned about being forced to replace my 36 year old septic system with a much more expensive system just because I needed to pump it out.	V1N3	
04/30/18	This is the BEST THING THAT HAS HAPPENED TO SUNOL...and especially KWA a member since 1956 ...I love attending all the meetings and making changes for our future.	V1N3	YES
04/30/18	When is the official decision going to be made on what we are responsible for regarding upgrading septic systems?	V1N3	
04/27/18	Cost	V1N3	
04/26/18	great project given the creek and number of septic systems made of wood	V1N3	
04/26/18	Septic tanks usually work well unless they are terribly old, and it is hard work to dig down to open the lids on mine. Having to do that every 5 years would make me very unhappy, not only for the labor involved but for the fact that the tank is situated under the pathway leading to my front door, meaning that there won't ever be a chance for the ground cover on the path to grow back. Is there really a need for such frequent inspections? Is there any data showing rates of failure for double compartment septic tanks? We are also quite concerned about how much the current septic plan will cost us.	V1N3	
04/26/18	This needs to regulated to keep our environment balanced	V1N3	

04/26/18	What the financial impact of getting on a sewer would be, on average. I think it's fine idea, depending on the cost.	V1N3	
04/26/18	Over regulation- septic tanks have been doing a fine job for many decades in many areas- We do need to address the concentrated septic issues of upper Kilkare area.	V1N3	
04/26/18	How will it affect those of us who installed a new system within the last 5 years.	V1N3	
04/26/18	Future cost and changing the landscape of Sunol	V1N3	
04/26/18	I want to know what the provisions will be for those who can't afford to upgrade but have failing systems.	V1N3	
04/26/18	Will we ever get a city sewer?	V1N3	YES
04/26/18	Questions have been asked in writing over a year ago and there has been no responses provided, even though they have been promised. What is the problem? How can the community get answers?	V1N3	
04/26/18	Expense born by the residents	V1N3	
04/26/18	Just want to make sure the County is not overstepping its control, i get the feeling of "Big Brother" watching over our poop containers!	V1N3	YES
04/26/18	If I had questions I'd attend the meetings and ask them there.	V1N3	
04/26/18	Many of us can't attend advisory council meetings because of our commutes or work hours. We need a plain-English explanation of what is happening and why. No bureaucratse, please!	V1N3	
04/26/18	Had to miss the last WG meeting, are minutes available anywhere?	V1N3	
04/26/18	Very concerned since this draconian, expensive plan can cause people to lose their homes. I'm not sure that most Sunolians even understand what it's all about.	V1N3	
04/17/18	Is the septic pipe line down Kilkare Rd still being considered?	V1N2	YES

04/07/18	We are already upgrading and putting in s new septic system. It's ridiculously expensive!	V1N2	YES
